Project title
IoT based Project
Blockchain
Application of AI in solving real world problems
Flood risk mapping and analysis using machine learning models
Privacy-Preserving Machine Learning Algorithms for Encrypted Domains
Stock Market Analysis And Forecasting Using Deep Learning
AI-driven Sentiment Analyzer
Sales Forecasting
College enquiry chatbot
Fake profile identification on social network using ML and NLP
TIME SERIES BASED PROBLEM ANALYSIS AND MODELING
Big Data/Machine Learning in Industry 5.0
Cloud based Recommendation System

Pothole detection
Streamlining Brain Tumor Detection in MRI Images through Deep CNN
Real-Time Brain Tumor Classification Using Functional MRI
Web Development projects
Real estate information system
Heart disease prediction using deep learning
Plant Disease Detection
Sentiment analysis on social media data
Personality prediction of Human using Machine learning
Lung Disease Detection using AI/ ML
Facial recognition for security

<b>Project title</b>
Risk mitigation Model for Internet of Things
A user-friendly web-interface for feature extraction from remote sensing satellite images.
Algorithmic Trading design and testing
Sentiment Analysis for Depression Detection Using Machine Learning Models
Human Detection and Action Recognition for Life Saving
Detection of Paddy Crops Diseases and Early Diagnosis Using Faster Regional Convolutional Neural Networks
IOT Based Toll Booth Manager System
Chronic Illness Prediction
Web Based inovative Project
Semi-Supervised deep learning approach for medical image
Identification of crop disease with help of deep learning
Malware detection system using deep learning
Deep Learning Models for Precision Diagnosis of Plant Diseases in Smart Agriculture
TIME SERIES BASED PROBLEM ANALYSIS AND MODELING
Cloud based Recommendation System

Expert system prediction for health care
Advanced NLP Parsing System for Multilingual Texts
Text Generation using Transformer Models.
Question Answering System using large language models.
Image Classification Using CNN
Blockchain approach for data and privacy preservation
Face recognition and detection
