

Brief about the activities:

Galgotias College of Engineering and Technology, Gautam Budh Nagar, has taken initiative to distribute sanitizer kit to the school kids in the adopted villages. When we visited the schools, none of the students were wearing mask because they did not have one. The reason is markets are very far from their village. Though the school kids were aware of the Covid-19 virus and its severity on human's health, they did not take any precautions.

The kids were very happy to receive a kit consisting of mask, fruit based sanitizer, gel based hand wash and a pencil in the kitty bag.

We did activity so that they remember how to take care of themselves when going out of home, to school or for playing.

We also sensitized the infection rate and how severe is the virus to the elders of the village and handed over the kitty bag to them as well.

Number of Beneficiaries : 250 school children
