24<sup>TH</sup> & 25<sup>TH</sup> MAY

# DAKSH EVENT REPORT

DAKSH is techno-cultural fest held every year by the department of Computer Science and technology, since 2016. Every year it is organized within the college premises but this year, it was held online and the students managed to pull it off very well, because of their determination and will to make it the best. It was a beautiful and perfect blend of technical and cultural events as various domains like culture, creative, decor, technical, and others came together and broke all bounds of magnificence. It was only because of the never ending support and guidance from the faculty members that this event was a huge success.

The fest started with the inauguration ceremony with great fervour and enthusiasm. All students and teachers attended the ceremony, and the assembly was addressed by various faculty members. Their kind and inspiring words gave us all the spirit of fervour.

Here is a short summary of two days of celebration we had:

The first day started with THOUGHT BOT, a very interesting technical quiz competition, followed by DESIGN STUDIO, an impromptu promotional poster making competition. Further, PEEP THE PICTURE, a movie guessing event, was organized that tested our knowledge of the cinema. We then had a creative writing competition, CATASTROPHE AND CREATION, followed by the most entertaining gaming event, our own version of Valorant tournament, FLICK AND FRAG. This marked the end of the day.

The second day started with PITCH-A-THON, the day started with a spark, with cool innovation ideas coming from the geeks among us. Our second event, DIG IT DEEP, a quiz competition of arts, was followed by SCAVENGER HUNT, which indeed was a fun event. Then, we moved to the talent hunt event, JASHN-E-HUNAR, and lastly we had SCRIBBLE, a multiplayer drawing and guessing game, which successfully culminated DAKSH.
