

BLOOD DONATION AWARENESS DAY

The blood donation awareness day awareness drive on blood donation was conducted on 24th September, 2020 by Mr. Sagar Dhameja. He is awareness Manager of Kanpur Team of Bloodconnect. He is also one of the most active volunteer. The students learned about the importance of blood donation, and pledged to become donors and help those in need. The students understood the effect of pandemic on the blood banks and supply shortage of blood for the needy. Various doubts and queries were solved by the speakers that it is not dangerous for students to donate blood during pandemic.

Blood Donation Camps

Sagar Dh

Youth holds the key: We need to convince only 6% of college going students to donate annually to solve this

EACH AWARE AND MOTIVATED DONOR CAN SAVE OVER 750 LIVES

It is safe to donate every 3 months

Every donation saves up to 4 lives

Donors can donate from age 18 through 65

Awareness at this age makes larger impact in the society

✓ Shortage would be met if **6% of all college going students** donate once a year -or- **2 % of the youth** of India donate once a year
