

PLANTATION DRIVE

CSE Department, GCET organized a Plantation Drive on 31st October 2023.

Plantation drives are very significant as they hold the key to addressing critical environmental and societal challenges. Planting trees is one of the most effective ways to combat climate change, as trees serve as natural carbon sinks, absorbing and storing carbon dioxide from the atmosphere. Beyond their role in mitigating climate change, trees contribute to cleaner air, improved water quality, and the preservation of biodiversity. Moreover, plantation drives bring people together, fostering a sense of shared responsibility and community engagement. They offer opportunities for education, skill development, and empowerment.

Students from all the sections volunteered in the drive and developed a deeper understanding of environmental issues and the importance of reforestation and tree planting. The drive was a successful one.
