Galgotias College of Engineering and  
Technology

# VISION

To become a centre of excellence for quality education and innovation globally to fulfil the need of Information Technology industry and society. To become a centre of excellence for quality education and innovation globally to fulfil the need of Information Technology industry and society.

# MISSION

1. To provide excellent learning environment for the students to be technically efficient in solving complex problems.
2. To motivate the students continuously in developing research based project and producing innovative solution in relevant to their field.
3. To impart social, moral and ethical values along with leadership abilities leading to a global professional.

# PROGRAM EDUCATIONAL OBJECTIVES (PEO)

1. Apply the mathematical, scientific and engineering fundamentals to provide suitable Information Technology solutions for real world engineering problems.
2. Produce software professionals and entrepreneur with a thirst for higher studies.
3. Exhibit professional and ethical attitude, effective communication skills and teamwork with a multidisciplinary outlook.

# **DIRECTOR'S DESK**

**It gives me great pleasure to give my best wishes to Glimpse , an annual magazine from Department of Information technology of Galgotias college of engineering and technology, Greater Noida. This magazine reflects all the hard work, participation and dedication of the students and the faculty members in making every event a success. I hope this magazine will serve as an inspiration to others to do their best.**

**Hoping that juniors will learn under the guidance of their senior and faculty members and will bring out the best they can. Hope to see more wonders in future. Wishing you all the best .**

**Mohd. Asim Qadri  
Director, GCET  
Greater Noida**

# CHIEF EDITOR'S DESK

**The goal of the department is to instil high morals, ethics, lifelong learning skills, concern for society and the environment, and core and cutting-edge information technology in students. This will be accomplished by imparting knowledge of information technology and teaching its application through creative methods. To prepare undergrads for the workplace, the department has a 'Centre of excellence' with 'Softpro India Computer Technologies (P) Ltd.'**

**I want to take a moment to express my deepest gratitude and appreciation to faculty, non-teaching staff and students of IT department for all your hard work, commitment, and unwavering support. As we continue on this journey together, let us remember the power of education to transform lives and make a positive difference in the world. Your contributions, both big and small, are shaping the future and creating opportunities for countless individuals.**

**Dr. Sanjeev Kumar Singh**  
**HOD(IT), GCET**  
Greater Noida

# EDITOR'S DESK

**Information Technology Department has proven the real meaning of success through its consistent hard work, innovative and techno-oriented events. My heartfelt gratitude to each one behind it. I would also like to thank out department head, Dr. S K. Singh for being our pillar through out and guiding us at every step.**

**We have tried to incorporate every story behind the success of the department. I truly appreciate all the efforts by our club heads Mirnalini and Vikhyat along with the whole family of Fusion Society who have made this possible. I would also like to thank out faculty members who have worked hard with the students. It wouldn't be possible without you. Lastly I hope this beautiful family of Fusion always sticks together.**

**Dr. Veena Mittal**  
**Deputy HOD(IT), GCET**  
**Greater Noida**

# CORE FACULTY

## **RAUNAK SULEKH**

**VICE - PRESIDENT**

**“A mentor is someone who allows you to see the hope inside yourself.”**

**She is an extraordinary personality, under her guidance work produced gets appreciated.**

**She stands with her students in thick and thin and push them in the right direction . Under her guidance, student climb the ladder of perfection and success . She has been the backbone of the Fusion Society since the beginning. The passion with which she committed herself is tremendous for which we will always be grateful.**

**She is Miss Raunak ,Vice President of Fusion Society of IT department for session 2022-2023.**

# GENERAL SECRETARY

## MIRNALINI CHAUHAN

GENERAL SECRETARY

**She is the General Secretary of Fusion Society for the session 2022-23. She has made outstanding contributions to the team, and she is deserving of the highest recognition. She has been a great mentor and providing us with advice and assistance that has been crucial to our progress. She spends time getting to know each team member, giving sage counsel, and encourage us to realise our full potential. Under her direction, we have promoted a teamwork-oriented workplace where everyone's input is respected and heard. She organises and distributes the team's workload across several duties. She has the capacity to inspire self-assurance, tenacity, and zeal in the team members.**

**We have been motivated to persevere and come up with creative solutions by her unflinching tenacity in the face of difficulty. Her moral leadership promotes a climate of trust, openness, and responsibility by setting the bar for honesty at the highest level. She inspires us to strive excellence and recognise our accomplishments with a laser-like concentration on results.**

# GENERAL SECRETARY

## VIKHYAT TEWARI

GENERAL SECRETARY

He is the General Secretary of Fusion Society for the session 2022-23. His enormous contributions have been priceless, and the success of our team has been greatly influenced by his commitment and knowledge. He had continually demonstrated outstanding leadership abilities, acting as mentors and assisting us in difficult tasks and stressful situations. His depth of expertise and experience has served as a source of motivation for all of us, propelling us to new heights.

He played a pivotal role in guiding the teams towards success. His contributions are invaluable, and he deserves recognition for his exceptional leadership. The strategic thinking, complicated situation analysis, and well-informed decision-making skills of him is exceptional. He can successfully handle obstacles because he has a strong grasp of the big picture. He acted as mentor, assisting and developing the talent. Assisting the team members in realising their full potential, he offers advices, insightful insights, and support.

# FACULTY ARTICLE

**The basic purpose of education and training - is to empower an individual to lead a successful life and contribute best to , ety, nation and humanity.**

Technology is the application of scientific knowledge for practical purposes, especially in industry. Technology is a tool that can be used to solve real-world problems. Emerging technology is a term generally used to describe a new technology, but it may also refer to the continuing development of an existing technology; it can have slightly different meaning when used in different areas, such as media, business, science, or education. The term commonly refers to technologies that are currently developing, or that are expected to be available within the next five to ten years, and is usually reserved for technologies that are creating, or are expected to create, significant social or economic effects.

Emerging Techniques in Computer Science:

**1. Artificial Intelligence and Machine Learning:** AI and machine learning have been rapidly advancing. Techniques such as deep learning, reinforcement learning, and generative adversarial networks have shown significant progress in various applications, including image and speech recognition, natural language processing, autonomous systems, and data analysis.

**2. Blockchain:** Blockchain technology, originally introduced for cryptocurrencies like Bitcoin, has expanded to various domains. It enables secure and decentralized transactions, smart contracts, and transparent record-keeping. Its potential applications range from financial services to supply chain management, healthcare, and more.

**3. Internet of Things (IoT):** The IoT involves connecting physical devices embedded with sensors, actuators, and network connectivity. It enables devices to communicate and share data, leading to advancements in areas such as smart homes, wearable technology, industrial automation, and smart cities.

**4. Big Data Analytics:** The exponential growth of data has led to the need for efficient techniques to analyse and extract valuable insights. Big data analytics involves processing and analysing large and complex datasets to identify patterns, trends, and correlations, thereby enabling informed decision-making.

**5. Cybersecurity:** With the increasing dependence on digital systems, ensuring robust cybersecurity

measures has become crucial. Techniques such as machine learning-based anomaly detection, cryptographic algorithms, and secure protocols are being developed to protect against cyber threats.

**6. Virtual Reality (VR) and Augmented Reality (AR):** VR and AR technologies are being explored in various domains, including gaming, entertainment, education, training, and simulation. They offer immersive experiences by combining virtual and real-world elements.

**7. Quantum Computing:** Quantum computing leverages the principles of quantum mechanics to perform computations that are exponentially faster than classical computers. Although still in the early stages, it has the potential to revolutionize fields such as cryptography, optimization, and drug discovery.

**8. Edge Computing:** Edge computing involves processing and analyzing data closer to the source or the edge of the network, reducing latency and bandwidth requirements. This is particularly important for applications that require real-time processing, such as autonomous

# FACULTY ARTICLE

vehicles, industrial automat

**9. Federated Learning:** Federated learning is a distributed machine learning approach that allows multiple devices or organizations to collaboratively train a shared model while keeping data decentralized and private. This technique is particularly relevant in privacy-sensitive applications, such as healthcare and financial sectors, where data cannot be easily shared due to privacy concerns.

**10. Meta-Learning:** Meta-learning, also known as "learning to learn," focuses on algorithms and models that can learn from prior learning experiences to adapt and generalize better to new tasks.

It explores methods for acquiring knowledge or learning strategies that can improve the efficiency and performance of learning systems.

**11. Natural Language Processing (NLP) Advancements:** NLP has seen significant advancements in recent years, with techniques such as transformer models, including BERT and GPT, demonstrating impressive language understanding capabilities. Researchers are now focusing on fine-tuning and improving these models further, as well as addressing challenges such as bias, ethics, and fairness in language processing.

**12. Edge AI:** Edge AI refers to the deployment of AI models and algorithms on edge devices, such as smartphones, IoT devices, and embedded systems, instead of relying solely on cloud-based processing. Edge AI enables real-time and low-latency inference, reduces dependence on network connectivity, and enhances privacy by keeping data locally processed.

**13. Robotics and Autonomous Systems:** The field of robotics and autonomous systems continues to advance, with research focusing on improving perception, decision-making, and control algorithms. Applications include autonomous vehicles, drones, robotic manipulation, and collaborative robots (cobots) that can work alongside humans.

**14. Quantum Computing Progress:** Quantum computing has seen advancements in hardware, algorithms, and applications. Efforts are being made to develop more stable and error-tolerant qubits, improve quantum error correction techniques, and explore applications in quantum chemistry, optimization, and cryptography.

**15. Data Privacy and Security:** With increased concerns about data privacy and security, researchers are

working on developing techniques that protect sensitive data while still allowing useful analysis. Differential privacy, secure multi-party computation, and homomorphic encryption are some of the areas being explored to ensure data privacy and secure computations. Technology is changing the way we live in this world. New technology developments show no sign of slowing down. Over time, other new technologies will emerge beside these technologies discussed in this article. Educators will continue to be challenged to incorporate these new technologies as they emerge. New technologies are not necessarily better than existing technologies for teaching. They may however offer new opportunities for teaching differently and may enable new or better learning outcomes, as well as improving on existing learning outcomes. . As technology develops, it strives to fulfill the changing needs of society. Technology progresses as society evolves. That being said, progress comes at a price.

## SAHIL BHATIA

### Data Science: "A New Dawn"

"A data verse of integers and codes,  
Each bit resonates, and a mystery unfolds.  
From spreadsheets to structured streams,  
Every bit flows with the veracity of dreams.  
Bits with attributes form an alliance.  
Behold, this is data science."

Data science is a vast genre that combines statistics, mathematics, and computer science. It involves extracting, analysing, and interpreting large volumes of data to gain valuable insights and support decision-making. It is an umbrella of data mining, machine learning, and statistical modelling to extract meaningful paradigms from complex datasets.

In simple words, the idea is crystal clear: "To clean the data, process the data, and ensure its analysis for solving real-world issues". Under its tutelage, one can learn the underlying characteristics needed to generate hypotheses, formats of data, and methods for collecting data through surveys, APIs, or web scraping. Exploratory analysis is a quest to explore, visualise trends, and delve into the core. However, real-world datasets contain errors, missing values, or inconsistencies.

Machine learning algorithms enable computers to learn from data and make predictions. Education, finance, medicine, or retail are paramount to data science. Presenting visually appealing data to technical and non-technical audiences is essential. To identify bottlenecks, improve efficiency, and reduce waste.

In a nutshell, data science is not a "magic bullet", it also has its limitations. Data quality, biases, and ethical considerations all need careful interpretation and validation. However, embracing data science is a rendezvous to a data-driven future.

## AARUSHI KHATRI

### Blockchain Technology

#### What is Blockchain?

Blockchain is a technology that facilitates the process of recording transactions and tracking transactions and assets in a network with transparency and immutability. Any valuable data can be tracked and traded on a blockchain network, reducing risk of tampering and misused.

#### How does it work?

In blockchain technology, data is stored in multiple blocks which are linked to each other. Every block has a unique hash value. This hash value gives identity to the block. Each block stores 3 particular things:

- Data
- Hash value
- Hash value of previous block

Any change made in a block will change the hash value in turn but previous hash value in the block will remain unchanged. This makes a blockchain immutable.

Various components and technologies used in blockchain are-

- Smart Contract
- Digital Wallet
- Consensus Algorithm
- P2P Network
- Blockchain Platform

Features of Blockchain are-

Blockchain is a decentralised technology, operates on transparent and immutable ledger.

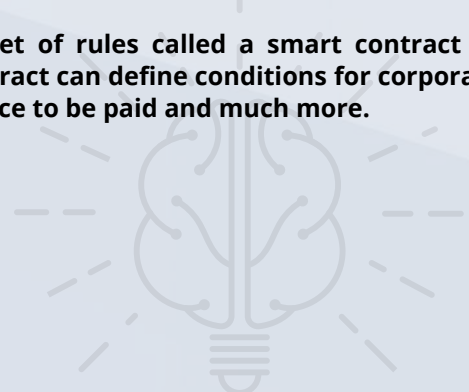

The key feature of blockchain is that it is distributed in nature.

No one can manipulate a transaction after it's been recorded to the shared ledger. If a transaction record includes an error, a new transaction must be added to reverse the error, and both transactions are then visible.

We use self-executing codes consisting of a set of rules called a smart contract to execute blockchain automatically. A smart contract can define conditions for corporate bond transfers, include terms for travel insurance to be paid and much more.

Applications of blockchain

- Digital Voting System
- Internet of Things (IoT)
- Personal identity security
- Healthcare
- Management of the Supply Chain
- Non-refundable tokens
- Transfer Contracts and Wills

# YOUNG THINKERS

## UMESH PANDEY

### The Rising Power of Artificial Intelligence: Transforming the Individual Experience

Artificial Intelligence (AI) has emerged as a transformative force, reshaping various aspects of our lives. From smart virtual assistants to personalized recommendations, AI's rising power has significantly impacted individuals across the globe. The effects of AI are evident in diverse fields, including healthcare, transportation, and entertainment, revolutionizing the way we work, communicate, and interact.

AI's ability to analyze vast amounts of data and derive meaningful insights has enhanced decision-making processes and efficiency. However, its growing influence raises important considerations for individuals. As AI becomes more integrated into our daily lives, questions arise regarding privacy, ethics, and employment. Striking a balance between convenience and safeguarding personal information becomes crucial.

Furthermore, AI's potential to automate tasks and replace certain job functions brings both opportunities and challenges. While it may lead to increased productivity and innovation, individuals must adapt to changing employment landscapes and acquire new skills to remain competitive in the AI-driven era.

As AI continues to advance, it is vital to ensure ethical guidelines are in place to govern its development and deployment. Collaboration between policymakers, technologists, and society at large is essential to navigate the complex implications of AI and maximize its benefits while mitigating potential risks. Embracing the rising power of AI requires a proactive approach. By staying informed, engaging in ethical discussions, and actively participating in shaping its trajectory, individuals can harness the transformative potential of AI to improve their lives and create a future that is both technologically advanced and human-centric.

## PLANTATION DRIVE

Considering the manifold benefits of trees, including that they release oxygen into the air, absorb unpleasant odours as well as harmful gases such as carbon dioxide, carbon monoxide and sulphur dioxide from the air and purify it, protect us from dangerous ultra-violet rays, provide us with food and the pivotal role played by trees in preventing soil erosion, maintaining ecological balance and most especially in lessening the effects of global warming, the Fusion Society team conducts tree plantation drives once a year.

On 17th October 2022, IT Department along with Fusion Society organized a PLANTATION Drive along with HOD Sir Mr SK Singh with Vice President Raunak Sulekh Ma'am at GCET campus. Tree plantation is not just something that should be done; instead, it is a necessity, the urgent need of the hour. Planting of trees is especially important to protect our environment against air pollution and global warming. To this end, our young volunteers have been actively involved in organizing tree plantation campaigns. The main purpose of this event was to:

- To motivate the students to keep their surroundings green and clean by undertaking plantation of trees.
- To imbibe habits and life style for minimum waste generation, source separation of waste and disposing the waste to the nearest storage point.
- Mobilise action against environmentally unsound practices like garbage disposal in unauthorised places, unsafe disposal of hospital wastes etc.

## ARDAAS 2.0

Guru Nanak Jayanti holds deep spiritual and cultural significance for Sikhs around the world. It celebrates the birth of Guru Nanak Dev Ji, the founder of Sikhism and the first of the ten Sikh Gurus.

On the auspicious occasion of Guru Nanak Jayanti, which falls on 8th November 2022, Fusion Society IT Department organized a remarkable Food Donation Drive called Ardas.

The drive aims to ensure that no one goes hungry, reflecting the Sikh concept of langar (community kitchen) where all are welcome to share a free meal regardless of their background.

Food was distributed to all the needy people across all important locations of Greater Noida such as Pari Chowk, Knowledge Park 2, Alpha 2 and other important locations. The camp served as a gathering place, bringing together individuals from different backgrounds and walks of life. It not only addresses immediate hunger but also spreads compassion and empathy. The camp raises awareness about the issue of food insecurity and educates the community about its root causes.

## DIWALI CELEBRATION

On 21st October, 2022 Fusion Society of IT department organized a small celebration of Diwali for all students . It was followed by dance full of enthusiasm and songs sung with joy and melody . But due to lack of time event has to be cut short and was wrapped up by a motivational speech by HOD sir. By the efforts and hardwork for all the students engaged and faculty that guided them , the event was a success.

Diwali celebration was a lively and joyful occasion that brought together students, teachers, and staff to honour the festival of lights. A prominent cultural event in India, Diwali celebrates the triumph of light over darkness and good over evil. The event aims to promote a sense of community, appreciation for diversity, and joyous spirit among college students.

The cultural acts given by the students were the highlight of the festival. There were classical music performances and traditional dances about the meaning of Diwali. The performances offered a layer of cultural richness to the celebration while showcasing our students' wide range of talents. Traditional Indian costumes worn by attendees added to the celebratory ambiance. The clothing's vivid hues and patterns added to the event's aesthetic appeal.

Diwali celebration was a huge success. Students and staff were able to gather together in a spirit of joy and unity, and it also offered a chance for cross-cultural communication and understanding. It was a great occasion for everyone involved because to the colourful décor and cultural performances.

# Co-curricular Activities

## AAGAAZ 2023

Aagaaz was organised by our Fusion Society on 23rd-24th February 2023. It was two-day extravaganza which was possible only by team work, co-ordination and motivation.

The opening ceremony began by invoking God's blessings followed by lamp lighting and Saraswati Vandana. A bouquet was presented to all the dignitaries and guests of honor. The theme of the event was "College life- reel v/s real". In order to justify the theme, a whole lot of performances were presented which entertained the audience to the fullest.

It consisted of various dance performances, singing performance, monologue, comedy performances etc. It was a great opening to start with.

On first day the events organized were talent hunt, diss mushaira, slay the ramp, coding beast, monologue, and chess.

On second day various events organized which includes creative creation (reel making), debate, basketball (three pointers), badminton, make a pitch, murder mystery (treasure hunt), wrestle the muscle, art attack, tug of war, and table tennis.

After two days of fun filled extravaganza, Aagaaz'23 came to an end. The closing ceremony was organized on 24th February, 2023. Our event would not have been successful if it wasn't for our hardworking members of Fusion Society.

## NUKKAD NATAK

In India, the term "nukkad" refers to an emotional performance that people engage in to raise awareness of a certain issue among the general population. Nukkad Natak, sometimes referred to as street play, is an entertaining theatrical performance that fuses art with social engagement. It offers a venue for educating the public about vital topics and spreading important messages. These Nukkad Natak, a type of street drama, are proudly linked to our illustrious cultural heritage. It is one of the oldest forms of storytelling and has been utilised to engage and interact with the general people on significant subjects. Nukkad Natak has various benefits. Naturally, they interact with the audience. The audience is unprepared and may not have much time to spare when they attend a play. These plays are brief. Close, direct, and intimate communication is used, which is typically noisy and obnoxious. Script and direction are important for a Nukkad Natak at all times.

On 25th November 2022 Fusion Society & Kalakriti organized a Nukkad Natak on ' Mahila Sashktikaran'. In order to create a society where women may exercise their rights, achieve their aspirations, and contribute to the advancement of the country, women empowerment is a critical component. A nukkad natak on this topic was organized after realising the importance of the issue in order to spread awareness, dispel prejudices, and motivate constructive change in the neighbourhood. The nukkad was well executed even after giving short time to practice. Mostly all the problems that a women face in her day-to-day life was covered in this by great performance by all the team members.

## WORKSHOP ON APPLICATION OF TECHNICAL ANALYSIS ON STOCK MARKET TRENDS

On 28th April, 2023 , Fusion Society of IT department conducted a workshop on Technical analysis on Stock Market in collaboration with Bounce Back Trading Academy , at A block seminar hall from 12:50 pm onwards . The majority of people believe that the best indicator of how well an economy is doing in a country is how that country's stock market is performing. And the speaker of the day to guide us all the way was Mr. Deepak Singh . He is a SEBI registered research analyst. Participants learned the differences between common and preferred stocks, as well as growth and value stocks, and how to choose stocks that align with their investment goals. Participants in the Understanding the Stock Market programme gained important knowledge about the world of stock market investment. As a result of the event, participants now have a greater grasp of how the stock market functions, the various investment strategies that are accessible, and the methods and tools required to make wise investment choices. The workshop's objective of arming attendees with the information necessary to confidently negotiate the stock market's complexity was successfully accomplished.

## WORKSHOP ON WEB DEVELOPMENT

The Web has become an integral part of everyday lives and it plays a crucial role in modern college education. A better understanding of the basics of web development is a stepping-stone for participants looking to further dive into professional web development and it also provides invaluable insights to everyday web users. By keeping this in mind FUSION SOCIETY on 5th May 2023 at GCET campus has organized Web development workshop in collaboration with Coding Blocks where Mr.Naman (Full Stack Web Developer) gave as knowledge as well as encouraged the students about the web development and their future scope that will be beneficial for students.

### Outcomes:

- Gained a basic understanding of the web-development process.
- Prepared us to pursue our web-development education.
- Understanding of read and write simple HTML, CSS and JavaScript codes.
- Learned how to explore, debug and understand a simple codebase.
